

Overview

Polyester composite strapping from PEC Tools offers a high-quality, robust material for securing goods of all shapes and sizes, regardless of how heavy, fragile, or expensive they may be. It is proven to reduce product damage and offers the same strength as steel but is cheaper and safer to work with.

Product data

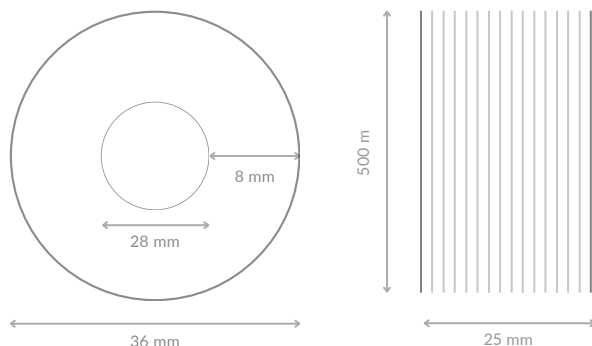

General information

Material	100% polyester cord
Nominal width	25mm
Thickness	0.64mm
System breaking strength	1500 kg
Length	500 meters per roll
Core diameter	200mm
Color	White
Package	2 rolls per box

Dimensions

Width (W)	25mm
Diameter (D)	130 W / LM
Core (C)	> 80

Dimensional drawing

COMPOSITE STRAP 25MM / 500M / DIAM. 200MM

Benefits

- Premium grade polyester strapping.
- Use with galvanised buckles or sheradised buckles.
- As strong as steel but only 16% of the weight.
- It is secured with metal buckles that allow re-tensioning.
- No corrosion or corrosion deposits on the load.
- Unaffected by extremes of temperature or humidity Weather & U.V.
- Resistant Supplied on 78mm or 76mm cores.
